CAUTIONARY STATEMENTS

Cautionary Note Regarding Forward-Looking Information and Forward-Looking Statements

Certain of the statements and information in this presentation may constitute “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995, the Corporations Act 2001 (Cth) and the Australian Securities and Investments Commission Act 2001 (Cth) and “forward-looking information” within the meaning of applicable Canadian provincial securities laws (collectively, “forward-looking statements”). Any statements or information that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as “expects”, “is expected”, “anticipates”, “believes”, “plans”, “projects”, “estimates”, “assumes”, “intends”, “strategies”, “targets”, “goals”, “forecasts”, “objectives”, “budgets”, “schedules”, “potential” or variations thereof or stating that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements. Forward-looking statements relate to, among other things: creating shareholder value; generating free cashflow from long life mines; organic growth; mergers and acquisitions; and estimated production from Silvercorp or OreCorp mines.

Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation, risks relating to: social and economic impacts of COVID-19; completion and timing of the transactions described above; receiving the necessary approvals to satisfy the conditions to the transactions; the determination of capital gains tax; fluctuating commodity prices; calculation of resources, reserves and mineralization and precious and base metal recovery; interpretations and assumptions of mineral resource and mineral reserve estimates; exploration and development programs; feasibility and engineering reports; permits and licences; title to properties; property interests; joint venture partners; acquisition of commercially mineable mineral rights; financing; recent market events and conditions; economic factors; timing, estimated amount, capital and operating expenditures and economic returns of future production; integration of future acquisitions into existing operations; competition; operations and political conditions; regulatory environment in China, Canada, Australia and Tanzania; environmental risks; legislative and regulatory initiatives addressing global climate change or other environmental concerns; foreign exchange rate fluctuations; insurance; risks and hazards of mining operations; key personnel; conflicts of interest; dependence on management; internal control over financial reporting; and bringing actions and enforcing judgments under U.S. and/or Australian securities laws.

This list is not exhaustive of the factors that may affect any of Silvercorp or OreCorp's forward-looking statements. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors, including, without limitation, those referred to in Silvercorp's Annual Information Form under the heading “Risk Factors”. Although Silvercorp and OreCorp have attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, described or intended. Accordingly, readers should not place undue reliance on forward-looking statements. No representation or warranty, express or implied, is made by either Silvercorp or OreCorp that any forward-looking statement will be achieved or proved to be correct.

Notes:

Canadian reporting standards differ from the current requirements of the 2012 edition of the Joint Ore Reserves Committee's Australasian Code for Reporting of mineral Resources and Ore Reserves (JORC Code). Estimates of mineral reserves and mineral resources extracted in this presentation or otherwise underlying or supporting statements made in this presentation are not, and do not purport to be, compliant with the JORC Code and are classified as both “foreign estimates” and “qualifying foreign estimates” under the ASX Listing Rules.

The forward-looking statements are based on the assumptions, beliefs, expectations and opinions of management as of the date of this presentation, and other than as required by applicable securities laws, neither Silvercorp nor OreCorp assumes any obligation to update forward-looking statements if circumstances or management's assumptions, beliefs, expectations or opinions should change, or changes in any other events affecting such statements. For the reasons set forth above, investors should not place undue reliance on forward-looking statements. Additional information related to Silvercorp, including Silvercorp's Annual Information Form, can be obtained under the Company's profile on SEDAR at www.sedarplus.com, on EDGAR at www.sec.gov, and on the Silvercorp website at www.silvercorpmetals.com.

Additional information related to OreCorp can be obtained under the Company's profile on ASX at www.asx.com.au and on OreCorp's website at www.orecorp.com.au.

Cautionary Note to U.S. Investors concerning estimates of Measured, Indicated and Inferred Resources

Silvercorp has prepared disclosure in relation to the Silvercorp projects in accordance with Canadian reporting standards and OreCorp has prepared disclosure in relation to the OreCorp projects in accordance with Australian reporting standards, both of which differ from the requirements of the U.S. Securities and Exchange Commission (the “SEC”). The terms “proven” and “probable” “reserves”, and “measured”, “indicated” and “inferred” “mineral resources” used in this presentation are in reference to the mining terms defined in the Australian Joint Ore Reserves Committee's Australasian code for Reporting of Mineral Resources and Ore Reserves (“JORC Code”) and the Canadian Institute of Mining, Metallurgy and Petroleum Standards (the “CIM Standards”), which definitions have been adopted in Canada by National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”).

Effective February 25, 2019, the SEC adopted new mining disclosure rules under subpart 1300 of Regulation S-K of the United States Securities Act of 1933 (the “U.S. Securities Act”), as amended (the “SEC Modernization Rules”), with compliance required for the first fiscal year beginning on or after January 1, 2021. The SEC Modernization Rules replace the historical property disclosure requirements included in SEC Industry Guide 7. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources”. In addition, the SEC has amended its definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” to be substantially similar to corresponding definitions under the JORC Code and the CIM Standards. While the SEC Modernization Rules are said to be “substantially similar” to international standards, readers are cautioned that there are differences between the SEC Modernization Rules, the JORC Code and the CIM Standards.

TRANSACTION DETAILS

Proposed Transaction	<ul style="list-style-type: none"> Silvercorp to acquire 100% of the shares of OreCorp by way of a Scheme of Arrangement (the “Scheme”) under the <i>Australian Corporations Act 2001</i> (Cth)
Consideration	<ul style="list-style-type: none"> For each OreCorp Share held, OreCorp shareholders to receive A\$0.15 in cash and 0.0967 of a Silvercorp common share valued at A\$0.45 for a total implied consideration of A\$0.60 per OreCorp Share¹ <ul style="list-style-type: none"> 31.5% premium to the closing price of OreCorp’s shares as of August 4, 2023² 41.7% premium to the 20-day volume weighted average price of OreCorp’s shares on the ASX for the period ending August 4, 2023³
Implied Value	<ul style="list-style-type: none"> Implies a fully-diluted in-the-money (FDITM) equity value for OreCorp of ~A\$242M
Ownership	<ul style="list-style-type: none"> Silvercorp and OreCorp shareholders to own 82.2% and 17.8% of the pro forma company, respectively⁴
Approvals and Key Conditions	<ul style="list-style-type: none"> Approval by OreCorp’s shareholders; <ul style="list-style-type: none"> Requires approval by 75% of OreCorp shareholder votes cast and a majority of OreCorp shareholders who vote at the meeting The completion of an Independent Expert report which concludes that the Scheme is in the best interests of OreCorp shareholders Approval of the Federal Court of Australia, regulatory approvals and other customary approvals
Other	<ul style="list-style-type: none"> Customary deal protections including no due diligence, no talk (each subject to fiduciary exceptions) and no shop Break fee of A\$2.8M payable to Silvercorp in certain customary circumstances
Concurrent Placement	<ul style="list-style-type: none"> Placement of approximately A\$28M in new fully-paid ordinary shares of OreCorp issued to Silvercorp at an issue price of A\$0.40⁵ per share such that Silvercorp will hold 15% of OreCorp’s issued capital following completion of the Placement

1. Based on the 20-day volume weighted average price of Silvercorp’s common shares on the NYSE for the period ending August 3, 2023, converted to Australian dollars using a U.S. dollar to Australian dollar foreign exchange rate of 1.526

2. Based on the closing price of OreCorp’s ordinary shares on the ASX as of August 4, 2023

3. Based on the 20 day volume weighted average price of OreCorp’s ordinary shares on the ASX for the period ending August 4, 2023

4. Based on share ownership in Silvercorp on a FDITM basis

5. Placement shares excluded from voting

BENEFITS TO SHAREHOLDERS

BENEFITS TO ORECORP SHAREHOLDERS

- Offer price of A\$0.60 per share (A\$0.15 per share in cash and 0.0967 of a Silvercorp common share for each OreCorp share)¹
 - Significant and immediate premium of 41.7% to OreCorp's 20-day VWAP²
 - Strong trading liquidity on the NYSE American and TSX – Silvercorp has agreed to use reasonable endeavours to apply for listing of Silvercorp on the ASX³
 - Ongoing exposure to future development and operational upside at Nyanzaga within the Silvercorp portfolio
- Positions Nyanzaga for prompt development
 - Funding backed by Silvercorp's balance sheet and cash flow, as well as strong operating and ESG credentials

BENEFITS TO SILVERCORP SHAREHOLDERS

- Accretive transaction on a NAV basis
- Provides immediate geographic and metal diversification
- Addition of a largely derisked, low-cost gold project that has key permits in place and is on track for first gold in H2 2025
- Re-rating opportunity due to enhanced scale, asset diversification, production and exploration upside as well as a foothold in an emerging, mining-friendly jurisdiction
- Meaningfully grows Silvercorp's mineral reserves and resources profile

1. Based on the 20-day volume weighted average price (VWAP) of Silvercorp's common shares on the NYSE American (the "NYSE") for the period ending August 3, 2023, converted to Australian dollars using a U.S. dollar to Australian dollar foreign exchange rate of 1.526
2. Based on the 20-day volume weighted average price of Silvercorp's common shares on the NYSE and OreCorp's ordinary shares on the ASX for the period ending August 4, 2023
3. Subject to successful admission of Silvercorp to ASX

1. Total contained metal in the Measured, Indicated and Inferred resources (inclusive of reserves), stated on a 100% basis
2. Based on consensus analyst research estimate and consensus metal prices of US\$22.97/oz Ag, US\$0.96/lb Pb and US\$1.34/lb Zn in 2023A, US\$23.49/oz Ag, US\$0.95/lb Pb and US\$1.27/lb Zn in 2024E, US\$23.21/oz Ag, US\$0.95/lb Pb, US\$1.27/lb Zn and US\$1,879/oz Au in 2025E, US\$22.67/oz Ag, US\$0.95/lb Pb, US\$1.25/lb Zn and US\$1,818/oz Au in 2026E, US\$22.32/oz Ag, US\$0.95/lb Pb, US\$1.26/lb Zn and US\$1,756/oz Au in 2027E, and US\$22.25/oz Ag, US\$0.95/lb Pb, US\$1.27/lb Zn and US\$1,741/oz Au in 2028E+. This represents the current expectation of potential growth and is not a production target for purposes of the ASX Listing Rules.

LAKE VICTORIA GOLDFIELDS & OVERVIEW OF TANZANIA

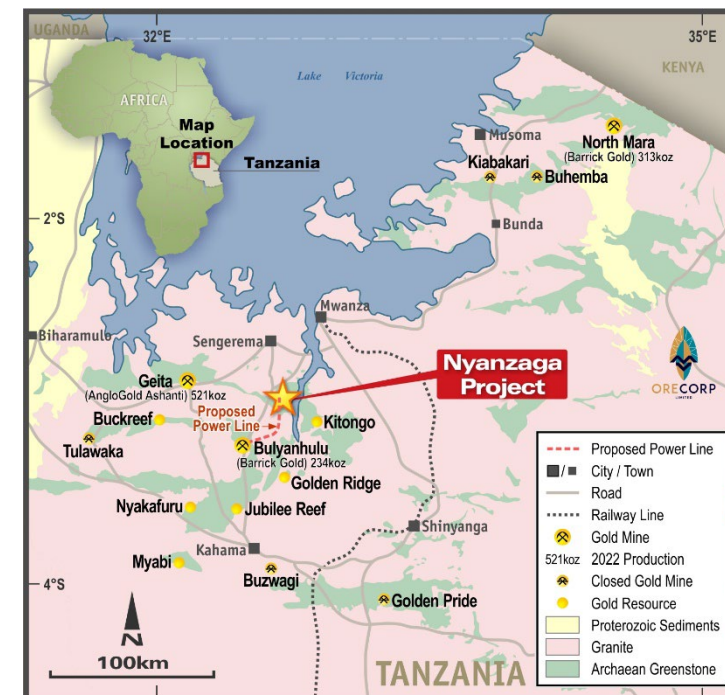

Lake Victoria Goldfields Overview

- The Lake Victoria Goldfields is a region of world class gold endowment
 - Produced over 25 Moz Au historically
- The region is well supported by infrastructure and services, as well as skilled labour for mining operations due to the concentration of large gold producing operations nearby
- Current active gold mines in the region include Geita (AngloGold Ashanti), Bulyanhulu (Barrick Gold) and North Mara (Barrick Gold)

Tanzania Overview

- Tanzania has seen major recent investment by majors including: Barrick, BHP, AngloGold Ashanti, TotalEnergies and Shell Plc¹
- Hydro power will deliver >70% of Tanzania's electricity upon completion of major infrastructure projects, with the remainder being composed of LNG
- Tanzania recently signed a major trade deal with the United States²

NYANZAGA DEVELOPMENT PLAN

Silvercorp has identified a number of opportunities in the Nyanzaga development plan that have potential to enhance the operation

Resettlement action plan

- The A\$28 million placement will allow the resettlement action plan to be advanced immediately

Increased mineral reserve profile

- Greater depth for the open pit than design detailed in the Nyanzaga DFS
- Utilisation of lower grade ore

Reduction of initial capex and life of mine G&A

- Phased approach to development and mining of the open pit and underground operations
- Underground development expected to occur once open pit mining operations have commenced

OVERVIEW OF SILVERCORP

- » Vancouver-based Canadian company listed on the TSX and NYSE American with market capitalisation of US\$518 million¹
- » A leading silver producer with over 90 Moz of silver produced over the past 17 years with 2 mining operations and remaining mine life of over 15 years
- » Strong balance sheet with US\$201 million in cash & short-term investments, no debt and a 28% strategic investment in New Pacific Metals
- » Widely held, including by leading global institutional investors, with no controlling shareholder
- » Industry-leading free cash flow per share growth and operating performance supporting optimisation of shareholder returns
- » Proven management team with a disciplined growth strategy focusing on higher margin economics and expanding resources

1. Based on the closing price of Silvercorp's common shares on the NYSE as of August 4, 2023

SILVERCORP: STABLE & PROFITABLE SILVER PRODUCER POSITIONED TO GROW

Historical Production

(April 2006 – June 2023)

- Silver: >90 Moz.
- Lead + Zinc: >1.3 Billion LBS
- Profit Distribution: >US\$520M
- +15 year mine life remaining

China Advantages:

- Close to customers (smelters)
- Close to suppliers
- Capable & disciplined work force
- Stable mining regulations
- Free market for metal
- Free profit distribution
- 2022 FDI surged ~10% to \$189 billion

ENDNOTES

Qualified Persons

The scientific and technical information relating to Silvercorp's projects contained herein has been reviewed and approved by Guoliang Ma, P. Geo., who is a Qualified Person ("QP") within the meaning of National Instrument 43-101 – Standards Of Disclosure for Mineral Projects ("NI 43-101") who supervised the preparation of the scientific and technical information of Silvercorp included in this presentation. The Qualified Person has verified the information disclosed herein using standard verification processes, including the sampling, preparation, security and analytical procedures underlying such information, and is not aware of any significant risks and uncertainties or any limitations on the verification process that could be expected to affect the reliability or confidence in the information discussed herein.

For more information on Silvercorp's projects, readers should refer to Silvercorp's latest Annual Information Form dated June 22, 2022, and Silvercorp's technical reports available on SEDAR at www.sedar.com.

The scientific and technical information related to Silvercorp's projects included in this investor presentation are derived from the following technical reports:

- NI 43-101 Technical Report Update on the Ying Ag-Pb-Zn Property in Henan Province, People's Republic of China with the effective date of September 20, 2022, prepared by AMC Mining Consultants (Canada) Ltd. ("AMC"). H. Smith, P.Eng., G. Vartell, P.Geo. and S. Robinson, P.Geo., MAIG of AMC Mining Consultants (Canada) Ltd.; R. Webster, MAIG and R. Cheshier, FAusIMM of AMC Consultants Pty Ltd.; A. Riles, MAIG of Riles Integrated Resource Management Pty Ltd., and Guoliang Ma, P.Geo. of Silvercorp Metals Inc. are Qualified Persons as defined by National Instrument 43-101. The Qualified Persons have reviewed and consented to this presentation and believe it fairly and accurately represents the information in the Technical Report that supports the disclosure. For further details please see section 12 of the technical report for statements from the QPs on data verification and a description of how the data was verified and any limitations on the verification process.
- NI 43-101 Technical Report Update on the Gaocheng Ag-Zn-Pb Project in Guangdong Province, People's Republic of China with the effective date March 31, 2021, prepared by AMC Mining Consultants (Canada) Ltd. ("AMC"). D. Nussipakynova, P.Geo., H. A. Smith, P.Eng., A. Riles, MAIG, A. A. Ross, P.Geo., and S. Robinson, P.Geo., MAIG. of AMC are independent Qualified Persons as defined by NI 43-101. G. Ma, P.Geo. of Silvercorp is a Qualified Person as defined by NI 43-101. All of the QPs reviewed and consented to this presentation and believe it fairly and accurately represents the information in the Technical Report that supports the

disclosure. The Mineral Reserve and Mineral Resource estimates have been estimated and compiled in accordance with definitions and guidelines set out in the CIM Definition Standards (2014). For further details please see section 12 of the technical report for statements from the QPs on data verification and a description of how the data was verified and any limitations on the verification process.

- NI 43-101 Technical Report for BYP Gold-Lead-Zinc Property, Hunan Province, China, effective date April 30, 2019, prepared by Tony Cameron, Principle Mining Engineer, Robert William Dennis, Executive Consultant, and Song Huang, Consulting Geologist. Mr. Guoliang Ma, P.Geo., Manager of Exploration and Resource of the Company, is the Qualified Person for Silvercorp as defined by NI 43-101 and has reviewed and given consent to the technical information contained in this presentation. Mr. Bob Dennis, Geologist of RPM, Mr. Tony Cameron, Principal Mining Engineer of RPM, and Mr. Huang Song, consultant for RPM, are Qualified Persons for the purposes of NI 43-101 and have reviewed and consented to this presentation and believe it fairly and accurately represents the information in the BYP NI 43-101 Technical Report that supports the disclosure. The reader is directed to the BYP NI 43-101 Technical Report on SEDAR or the Company's website for details of the estimate. For further details please see section 12 of the technical report for statements from the QPs on data verification and a description of how the data was verified and any limitations on the verification process.

Competent Person's Statement

The information in this presentation relating to OreCorp's Exploration Results, estimates of Mineral Resources, Ore Reserves Statements and the production target in relation to Nyanzaga is extracted from the ASX announcements dated 22 August 2022 ("Nyanzaga DFS Delivers Robust Results"), 5 May 2022 (DFS Completion and Kilimani Mineral Resources Estimate Update") and 12 September 2017 ("MRE Update for the Nyanzaga Project Increasing Category and Grade") which are available to view on OreCorp's website www.orecorp.com.au. OreCorp confirms that it is not aware of any new information or data that materially affects the information included in the original announcements and, in the case of Exploration Results, estimates of Mineral Resources, Ore Reserves Statements and the production target in relation to Nyanzaga, that all material assumptions and technical parameters underpinning the Exploration Results, estimates of Mineral Resources, Ore Reserves Statements and the production target in relation to Nyanzaga (and any forecast financial information derived from the production target) in the original announcements continue to apply and have not materially changed. OreCorp confirms that the form and context in which the Competent Persons' (being Messrs Malcolm Titley, Anton Geldenhuys and Allan Earl) findings are presented have not been materially modified from the original announcements.
